

Presidential Search Committee to host open forums

The Presidential Search Committee will be hosting open forums next week to solicit input on OLLU's key needs and priorities and the attributes we will be searching for in the university's next president.

Separate sessions for students, faculty and staff will be held both in person and virtually. RSVP if you are planning on attending the in-person sessions to allow for accommodations for social distancing. Links for those wishing to join virtually are provided below.

For those unable to attend a forum, a stakeholder survey will also be made available for your input. The survey will allow students, faculty, staff, alumni, CDPs and other community members to provide feedback for this important search.

Your input is very important. Please make plans to join the appropriate session.
